

SOL/AC/EOL connectors

Andel's tried and tested Floodline multi-zone leak detection systems are well known for being the most reliable, effective and easy to use. The "Plug & Play Auto-Connect" system allows instant, foolproof connection for quick, no-hassle installation by any engineer, contractor or competent person.

● Couplers

In/out couplers perform all connection and zone change functions. No setup or links to change. No wire stripping. No confusion.

● SOL – Start of Line

Connects Leader Cable to Detection Cable

● Autocoupler

Connects one detection cable zone to another. In-built system logic automatically sets its relative position and zone address.

● EOL – End of Line

Terminates last zone in line

Andel leader cable

Andel supply dedicated leader cabling.

Used for connecting Floodline Sensors to Floodline Alarm Panels and for branching between detection areas on the same detection string.

Andel's purpose-made Leader Cable is all LSF0H construction for use in modern industrial/commercial environments. The core colours of the detection cable match the colours of the detection cable making installation simpler.

Batteries

To maintain power in Andel leak detection systems, high-quality batteries are used that ensure full reliability. They are dedicated and proven solutions for emergency power supply in alarm systems.
