

Water Sensor

The Floodline Point Sensor is a compact sensor for vertical or horizontal mounting. Water touching its stainless steel probes activates the alarm. Used with the stainless steel Floodline Guard Plate to give heavy duty physical protection and assist fixing and adjustment.

The Point Sensor is used where Detection Cable could be damaged or where some damp, minor wetting or spillage is expected or of little concern. The sensor can be connected in any number and/or combination with other Floodline sensors.

● Applications

Plant rooms
Solid floor area
Basement/tunnels

● Detection

Activates when any conductive liquid makes contact across the probes
Multiple re-use
Instant return to use after water is cleared up

● Construction

High density plastic body, stainless steel/nickel plated brass probes
Heavy duty, stainless steel Guard Plate
Encapsulation option for immersion proofing

● Dimensions

Sensor: H71mm x W44mm x D25mm
Guard Plate: H110mm x W105mm x D30mm

● System

Connected in any number and/or combination with other Floodline sensors
